

# WoW Character Creation

Jenna

method variables:

- String[] Set User Faction
- Race (object I made) Set User Race
- String Set User Class
- String Set User Gender

```
main method (String[] args){
```

```
// intro
```

```
// call methods }
```

```
method : String[] Set User Faction () {
```

```
// reads choices
```

```
// valid responses only → loops
```

```
// person chooses faction → gives specific races for each faction }
```

```
method : Race Set User Race {
```

```
// reads choices
```

```
// valid responses only → loops
```

```
// person chooses race → gives specific classes for each race }
```

```
method : String Set User Class {
```

```
// reads choices
```

```
// valid responses only → loops
```

```
// person chooses race }
```

```
method : String Set User Gender {
```

```
// reads choices → loops
```

```
// valid responses only }
```

```
// display everything person picked
```
